TO WHOM IT MAY CONCERN

Mr. S. M. Darraj Hossain has developed his very own multimedia CD named "Doctors Prescription Data Bank". The CD basically consists of articles on different diseases, collected from different national dailies and magazine. Mr. Hossain has been collecting articles of this kind for about 10 years. He has collected nearly a thousand articles till date and has put 103 of them in the CD and working to upgrade it with more articles. There are articles on many common diseases such as dengue, polio, typhoid, diabetes, cancer and the like. Pictures are included with the write-ups, as well as references of the newspapers from which they've been taken. The greatest aspect of the CD is that all the articles are dictated and read out to the user, so that S/he may not have to take the trouble of going through them. Apart from the articles, another integral component of the CD is a list of addresses and contact numbers of hospitals, clinics and physicians something that may prove handy any time.

I wish every success of this great endeavor.
